

# OLIVACTIVE®

## Why use this material?

olivactive® is an olive leaf (*Olea europaea* L.) extract to strengthen the immune system, relieve fatigue and enhance health naturally, standardised to  $\geq 20\%$  oleuropein and to  $\geq 2\%$  bioflavonoids by HPLC.

Olive leaves are a natural source of Oleuropein and bioflavonoids, with studies showing its potent anti-inflammatory and antimicrobial properties.

The extract is 100% traceable natural olive produced from a unique source of ancient olive trees in Spain. With high stability of  $>2$  years, olivactive® has high antioxidant compounds (bioflavonoids) and is kosher certified.

## The science behind the indications

olivactive®'s main mechanisms of action:

- Macrophage and granulocytes stimulation to start a proinflammatory pathway to help combat pathogens
- Oleuropein breaks down hydroxytyrosol during digestion, which may promote bacteria cell walls breaking and cellular membrane damaging
- olivactive® may attenuate the overall inflammatory state and reduce inflammation in several cell types

## Indications, Claims and Dose

**Dose:** 500mg extract per day

- For use in liquids, tablets, two-piece hard capsules and soft-gel capsules
- Helps maintain and support immune system health
